FOR IMMEDIATE RELEASE

Dryvit President and CEO Mike Murphy Elected President of EIFS Industry Members Association (EIMA)

WEST WARWICK, R.I. (February 16, 2016) — Dryvit Systems, Inc., the leading manufacturer of exterior insulation and finish systems (EIFS) in North America, announced today that its President and CEO Mike Murphy has been elected President of the EIFS Industry Members Association (EIMA).

Founded in 1981, EIMA is a national non-profit technical trade association comprised of leading manufacturers, suppliers, distributors and applicators involved in the EIFS industry.

Murphy will serve in his new role for a two-year term that began earlier this month. “Mike Murphy has been a recognized leader in our industry for many years, and we are very pleased to have him serving as our president,” said Dave Johnston, the executive director of EIMA.

In addition to electing Murphy as its president, EIMA elected a full slate of officers that will serve with Murphy in leading the EIMA Board of Directors over the next two years.

EIMA is committed to advancement and growth of the demand for EIFS by accomplishing objectives which either cannot be achieved by individual members, or those which are more efficiently carried out collectively. Specifically, EIMA supports the industry by developing consensus technical, training, installation, and design standards for use by architects, designers, code bodies and officials, and other technical associations. EIMA also monitors and positively influences government actions and works to assure the long-term availability of qualified contractors.

“EIMA has done an excellent job helping our industry address challenges and seize opportunity,” said Murphy. “I’m honored to have been elected president and look forward to working with my fellow officers from across our industry to help advance our important mission.”

Murphy said his election as president of EIMA is a reflection of the important role Dryvit plays in the EIFS industry, a contribution he called a well-deserved source of pride for Dryvit’s employees and distributors.

About Dryvit Systems, Inc.

Dryvit Systems, Inc. (www.dryvit.com) is the manufacturer of Outsulation®, the premier Exterior Insulation and Finish System (EIFS), in the U.S. Dryvit operates all North American manufacturing facilities to both ISO 9001:2008 and 14001:2004 standards. Dryvit is a member of, and is actively engaged in, many relevant construction-related organizations such as AWCI, EIMA, NAHB, USGBC, ABAA, AIA and CSI. Dryvit works both independently and within those organizations to promote energy efficient construction methods that create jobs, reduce reliance on non-renewable energy sources, and reduce the carbon footprint of our nation’s buildings. Dryvit is headquartered in West Warwick, R.I., and has manufacturing facilities there as well as in Georgia, Oklahoma, California, Canada, Poland, and Germany.
