Cirrus DS II

Sedona DS II

Lace - Pearlescent

Mist - Pearlescent

T1221 - PP

The workhorse – a durable, highly-desirable interior finish to meet the demands of today’s busy interior spaces.

Plexture is the interior design workhorse; a moderately priced wall finish with durability few other interior wall materials can match. This seamless, acrylic textured finish is aggressively priced; with a typical installation price below \$0.75/sq.ft. for a standard Plexture finish for medium scale commercial installations with national average labor costs. The appearance is similar to many knock down finishes, but the durability, washability, abuse resistance and mold & mildew resistance have allowed Plexture to capture a large percentage of the hospitality marketplace.

More design options are available with the **Premium Plexture** finishes such as **Symphony, Sedona DS II, and Orange Peel**. **Premium patterns Lace & Mist** add a subtle high performance pearlescent effect. Premium Plexture will typically install for \$1.00-1.25 per square foot under the same project conditions. Regardless of the finish selected, Plexture is highly scrubable and is warranted against mold and mildew growth (ASTM D 3273). Visit our website for all our technical data.
