# Don't Let the Weather Slow You Down.

## Extend Your Day... Extend Your Season.

Don't let dormant grass and chilly temperatures reduce your available working hours or put a damper on your construction season. With Dryvit's seasonal products, you'll be "Faster to the Finish" every time, which is good news for your bottom line.

## Rapidry DM™

**Fast Setting Adhesive and Base Coat**  
**Keep business brisk when the weather is cool.**

### Rapidry DM 35-50

Apply when job site and wall temperatures are 35 °F (2 °C) to 50 °F (10 °C).

### Rapidry DM 50-75

Apply when job site and wall temperatures are 50 °F (10 °C) to 75 °F (24 °C).

# RapidPatch™

## Fast Setting, Non-Sagging, Patching Material

**Patch it fast, patch it well... even in chilly temperatures!**

RapidPatch is a one-component, fast-setting, patching material for Dryvit systems.

**Features:** RapidPatch is an exceptional patching material specially engineered to patch holes in an existing EIF system up to a maximum 3 in x 3 in x 1 in (76 mm x 76 mm x 25 mm).

**Benefits:** A fast application, fast drying time. After mixing, the working time of RapidPatch is 20-30 minutes. The finish coat can often be applied in 60 minutes at 70 °F (21 °C), 55% relative humidity. Lower temperatures and higher humidity will extend the curing time.

A customer's RapidPatch™ experience...

***“RapidPatch allowed us to move the platform staging the same day we finished the work above. We saved two days of scaffold rental.”***

– Al Meyer, Valley Interior Systems  
Cincinnati, OH

A customer's Rapidry DM™ 35-50 experience...

***“We used Rapidry 35-50 on a project in December and January when we were in adverse conditions with both cold and moisture. With Rapidry DM 35-50, we had at least 20% time savings over using other products (Primus® & Genesis®). And we saved tremendously on labor (3 days totaling \$7,500). Rapidry is tough to beat because you can stick the foam and do a base coat all in the same day. Come wintertime, we will definitely use Rapidry 35-50 again.”***

– Wyatt Spriggs, Ryan Interiors Inc.  
Stafford, VA

Private Residence | Hendersonville, TN

A customer's Rapidry DM™ 50-75 experience...

***“Rapidry DM 50-75 allowed us to stick the foam, rasp and mesh all in the same day. This was needed because we were on swings 130-150 feet in the air that needed to be moved and set up for every 50 feet section of the wall. With 900 linear feet of wall, I bet we cut 30 swing days off the project by using Rapidry, which resulted in at least \$5,000 in savings in rental costs and labor.”***

– Don Ulmer, Ulmer Construction Incorporated  
Jupiter, FL

# Save Time. Finish Faster.

## Backstop® NT Spray 55-Gallon Drums

Perfect for larger projects.

**Features:** 55 gallons of Dryvit's liquid-applied air- and water-resistive barrier.

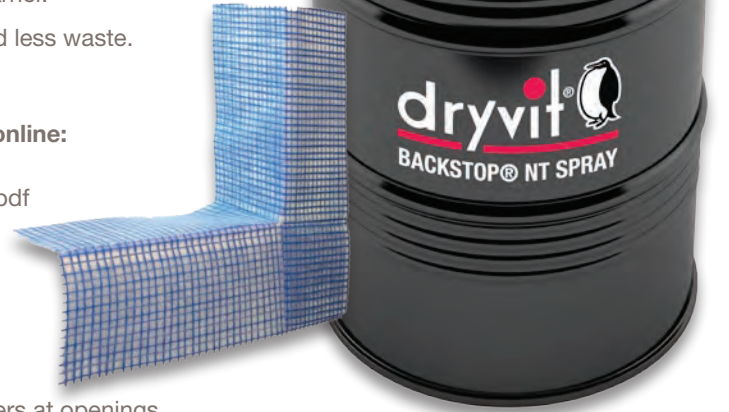

**Benefits:** Spraying saves time and money with fewer stops for refills and less waste.

To learn more, check out our product data sheet online:

Backstop® NT Spray 55-Gallon Drums (DS455)

Available in new, more convenient sizes to help you get

**Faster to the Finish**

A customer's AquaFlash® Corners experience...

***“Easy to use, works well. Definitely a faster process than cutting the pieces to fit the corners. Saves us time and money.”***

– Vance Austin, Big Time Plastering | Grovetown, GA

A customer's Backstop® NT Spray experience...

***“Spraying is the fastest method to apply a liquid air barrier and having Dryvit's Backstop NT supplied in a 55-gallon drum allows me to get the job completed faster without having to constantly fill my spray unit from a 5 gallon pail.”***

– Marcos Galindo, Dutch's Masonry | Lakewood, CO
