

WEATHERLASTIC® SMOOTH

Flexible, Waterproof Elastomeric Exterior Coating

Product Overview

Weatherlastic Smooth is a water-based elastomeric wall coating. It is easily applied with an airless spray or roller. Weatherlastic Smooth is based upon a 100% acrylic, copolymer elastomeric resin, which provides excellent elongation and flexibility at low temperatures. The coating resists mildew growth and dirt pickup and is highly chalk-resistant.

Weatherlastic Smooth is recommended as a waterproof coating on properly prepared concrete, masonry, EIFS and stucco substrates.

Features & Benefits

- Elastomeric, plasticizer-free formulation bridges hairline cracks and is highly-resistant to cracking
- Dirt Pickup Resistance (DPR) means walls stay cleaner longer
- Industry-leading warranty options that start directly after installation
- Available in a variety of color options
- Compatible with Tremco's Dymonic® Simple Seal – which can be coated with Weatherlastic Smooth to match
- Moisture vapor transmission: 30 perm
- Highly-resistant to the growth of mildew
- Low temperature flexibility
